

Website Design

Includes design-rich home page, a unified theme throughout your site, and JavaScript rollover navigation. Designed with Dreamweaver.

With signed contract and deposit of the Home Page fee, I will provide up to three draft designs based upon your communicated preferences. Your draft website will be uploaded for viewing, feedback, and changes as it develops.

You will kept appraised of the time spent in developing additional pages so you can monitor your costs and determine how many changes and revisions you would like to request.

Upon final approval of your website, the remainder of the balance will be due and you will then receive your website and files on a CD, ready for uploading. If you host your website with StudioPeg Design, I will upload the site for you and set up your email.

Website design and Home Page\$350 flat fee
Additional pages.....\$45/hour
